EXPERIENCE

BixBytes Solutions, Mangaluru – Software Engineer

MAY 2025 - PRESENT

- Developed and maintained a client-facing web application using their proprietary Angular UI component library, ensuring seamless alignment with brand and UX guidelines.
- Integrated additional functionality using well-known third-party libraries (e.g., Angular Material, Tailwind), enhancing the feature set and improving end-user experience.
- Collaborated closely with the client's design and back-end teams to deliver performant, responsive, and scalable front-end solutions.
- Implemented E2E testing of UI using the Cypress testing framework.
- Developed the UI for the client product using Angular Material library

Accenture, Bengaluru – Associate Software Engineer

NOV 2022 - APR 2025

- Worked on the UI redesign of an internal project management webpage, successfully integrating key features using Angular, improving user experience and functionality.
- Collaborated closely with the Product Owner to address and implement critical Change Requests, ensuring smooth and successful deployment to production.
- Contributed to developing new features, while also troubleshooting and resolving both production and non-production bugs to ensure optimal performance.
- Responsible for the remediation of security vulnerabilities identified through code scans, ensuring the application's compliance with best security practices.
- Implemented API logic changes using Node.js to support new features and enhance application capabilities.
- Developed a Proof of Concept (PoC) for a new feature, demonstrating its potential value and feasibility for future implementation.

SKILLS

HTML5 & CSS3

Angular

TypeScript

Tailwind

Cypress

CERTIFICATIONS

AZ-900: Microsoft
Certified-Azure
Fundamentals

SC-900: Microsoft
Certified-Security,
Compliance, and Identity
Fundamentals

AI-900: Microsoft Certified-
Azure AI Fundamentals

Python for Everybody
(Coursera Specialization)

LANGUAGES

English, Kannada, Hindi, Tulu

EDUCATION

N.M.A.M. Institute of Technology, Nitte— *B.E. Mechanical Engineering*

Aug 2018 - Jun 2022

CGPA- 9.21

PROJECTS

Portfolio website using HTML/CSS/Angular

A portfolio website built using HTML5, CSS3, and Angular

Deep Learning based surface roughness prediction and modeling of high-speed machining of Ti6Al4V using vibrational signal — *B.E. Final project*

ACHIEVEMENTS

**Undergraduate-level technical paper published in SRC journal -
“Use of Deep Learning for Classification of Machined Surfaces”**

Published on 16/01/2023 (<https://doi.org/10.52458/978-81-95502-01-1-15>)
